EXI	HIBIT MAM – 1R	Retired Unit O&M Adjustment - Workpaper WP A-3.3	7
EXI	HIBIT MAM – 2R	ETEC-NTEC RFI 1-20	
EXI	HIBIT MAM – 3R	Scott Norwood Direct Testimony - Attachment SN-6	

i

I. INTRODUCTION

- 2 Q. PLEASE STATE YOUR NAME, POSITION AND BUSINESS ADDRESS.
- 3 A. My name is Monte A. McMahon. I am Vice President Generating Assets for
- 4 Southwestern Electric Power Company (SWEPCO or the Company). My business
- 5 address is 2400 FM 3251, Hallsville, Texas.
- 6 Q. DID YOU FILE DIRECT TESTIMONY IN THIS CASE?
- 7 A. Yes.

1

8 II. PURPOSE OF REBUTTAL TESTIMONY

- 9 Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?
- 10 A. The purpose of my rebuttal testimony is to respond to certain portions of testimony
- submitted by Mr. Scott Norwood on behalf of the Cities Advocating Reasonable
- Deregulation (CARD) and Ms. Devi Glick on behalf of Sierra Club. Specifically, I will
- address Mr. Norwood's recommendation to disallow select portions of the Company's
- Test Year level of Generation non-fuel production O&M expense (Generation O&M)
- and Ms. Glick's finding that the Company has not performed an analysis demonstrating
- the prudence of retrofitting the Welsh Plant units to operate on natural gas.

17 III. MR. NORWOOD - GENERATION O&M

- 18 Q. ON PAGE 3, LINES 7-17 AND PAGE 5, LINE 7 THROUGH PAGE 6, LINE 9, MR.
- 19 NORWOOD ASSERTS THAT THE COMPANY UNREASONABLY INFLATED
- 20 ITS REQUESTED LEVEL OF GENERATION O&M BECAUSE IT DID NOT

1		MAKE AN ADJUSTMENT TO ACCOUNT FOR THE RETIREMENT OF DOLET
2		HILLS AT THE END OF 2021. DO YOU AGREE?
3	A.	No, I do not. During the Test Year and until its retirement at the end of 2021, Dolet
4		Hills has been and will continue to be offered into the energy market year round,
5		incurring expenses required to ensure the unit is available to operate when called upon
6		by the Southwest Power Pool (SPP). SWEPCO expects that Dolet Hills will operate
7		seasonally in 2021 much like it did during the Test Year and that, as a result, O&M
8		expenses will also be similar. Mr. Norwood's adjustment would significantly under-
9		recover the plant's O&M in 2021, following the March 2021 effective date of rates in
10		this case.
11	Q.	ON PAGE 3, LINES 18-27, AND PAGE 6, LINE 10 THROUGH PAGE 7, LINE 12,
12		MR. NORWOOD CONTENDS THAT THE COMPANY'S REQUESTED LEVEL
13		OF GENERATION O&M DOES NOT ACCOUNT FOR THE RECENT
14		RETIREMENTS OF FIVE OF ITS NATURAL GAS GENERATING UNITS. DO
15		YOU AGREE?
16	A.	No, I do not. In my direct testimony on page 21, lines 1-2 and page 26, lines 14-19, I
17		specifically discuss removal of the entire amount (\$616,316) of Test Year Generation
18		O&M associated with the recently retired units identified by Mr. Norwood - Knox Lee
19		Units 2-4, Lieberman Unit 2, and Lone Star Unit 1 (retired units). Workpaper WP A-
20		3.7 (attached as Exhibit MAM-1R) for this adjustment was provided with the
21		Company's Application and referenced in the Company's response to ETEC-NTEC
22		RFI 1-20 (attached as Exhibit MAM-2R), which also included a breakdown of the
23		amount removed for each retired unit.

- 1 Q. PLEASE EXPLAIN HOW THE COMPANY IDENTIFIED THE AMOUNT OF
- 2 TEST YEAR O&M EXPENSE ASSOCIATED WITH THE RETIRED UNITS?
- 3 A. As shown in Exhibit MAM-1R, the Company maintains O&M expense records by
- 4 "Benefiting Loc" (i.e., benefiting location), which identifies costs at the generating unit
- bevel. Extracting test year O&M expense using this identifier ensured that the
- 6 Company's adjustment of \$616,316 accounted for all costs incurred for the retired
- 7 units.
- 8 Q. AT ANY POINT IN HIS TESTIMONY, DOES MR. NORWOOD ACKNOWLEDGE
- 9 THAT THE COMPANY REMOVED THE TEST YEAR O&M EXPENSE FOR THE
- 10 RETIRED UNITS?
- 11 A. No, he does not.
- 12 Q. USING HIS CALCULATION IN ATTACHMENT SN-6, WHAT LEVEL OF TEST
- 13 YEAR GENERATION O&M ADJUSTMENT DOES MR. NORWOOD
- 14 RECOMMEND TO ACCOUNT FOR THE RETIRED UNITS?
- 15 A. In total, Mr. Norwood is recommending a \$1,699,879 reduction to Test Year
- Generation O&M nearly 3 times the historical Test Year amount of the retired units.
- His recommended adjustment exceeds the Company's adjustment of \$616,316 by
- 18 \$1,083,563.
- 19 Q. WHAT METHOD DOES MR. NORWOOD USE TO CALCULATE THE IMPACT
- 20 OF THE RETIRED UNITS ON TEST YEAR GENERATION O&M?
- 21 A. In Attachment SN-6 (attached as Exhibit MAM-3R), Mr. Norwood calculates his
- 22 proposed adjustments using a plant-level analysis. He calculates these plant-level
- adjustments based on the percentage of capacity retired at each affected generation

1	plant.	The amount	of his	recommended	plant-level	reduction to	Test	Year expens	e,
---	--------	------------	--------	-------------	-------------	--------------	------	-------------	----

- shown as "CARD ADJUST", is in addition to the amount already removed by the
- 3 Company for the retired units (shown as "SWP Adj to TY").
- 4 Q. PLEASE EXPLAIN THE PLANT-LEVEL ADJUSTMENTS CALCULATED BY
- 5 MR. NORWOOD IN ATTACHMENT SN-6 TO HIS DIRECT TESTIMONY.
- 6 A. To calculate Mr. Norwood's total plant-level adjustment, one must add line item
- 7 "CARD ADJUST" to line item "SWP Adj to TY" the Test Year amount already
- 8 removed by the Company. For the Knox Lee plant, in *total* he proposes a \$696,217
- 9 reduction to Test Year expense more than 23 times the actual Test Year amount for
- retired Knox Lee Units 2-4. He proposes a total reduction of \$504,022 to the
- 11 Lieberman plant Test Year expense more than 6 times the actual Test Year amount
- for retired Lieberman Unit 2.² Although the "SWP Adj to TY" amount in SN-6 does
- not match the Company's total Test Year adjustment for Lone Star, Mr. Norwood's
- plant-level calculation is consistent with the Company's in removing the entire amount
- of Test Year expense for Lone Star, a single unit facility. As I previously mentioned,
- 16 Mr. Norwood's total recommended Test Year O&M adjustment calculated in
- 17 Attachment SN-6 is \$1,699,879 nearly 3 times the amount of actual Test Year expense
- incurred for the retired units.

¹ Monte A. McMahon, Rebuttal Exhibits MAM-1R and MAM-2R.

 $^{^{2}}$ Id

³ The Lone Star "SWP Adj to TY" amount included in Mr. Norwood's Attachment SN-6 is \$18,107 less than the total amount removed by the Company from Test Year O&M and reflected in Exhibits MAM-1R and MAM-2R. The amount used by Mr. Norwood was provided by the Company in response to CARD RFI 1-15, which did not include amounts in FERC accounts 5600, 9200, 9210, and 9302, which are Lone Star Test Year expense falling outside non-fuel production FERC accounts. All Test Year expenses for Knox Lee and Lieberman were captured in non-fuel production FERC accounts.

1	Q.	IS MR. NORWOOD'S RECOMMENDED TEST YEAR GENERATION O&M
2		ADJUSTMENT REASONABLE?
3	A.	No, Mr. Norwood's recommended adjustment ignores economies of scale and
4		artificially inflates the impact of the retired units on Test Year Generation O&M by
5		almost 300%. His plant-level calculations are approximations, rather than actual Test
6		Year expenses associated with the retired units. The Company's proposal to remove
7		the actual amount of the retired units' Test Year expense is reasonable and based on a
8		known and measurable change, not an inflated approximation as recommended by Mr.
9		Norwood.
10	Q.	WHEN A GENERATING UNIT RETIRES AT A FACILITY WITH REMAINING
11		UNITS OPERATIONAL, ARE PLANT-LEVEL O&M EXPENSES NECESSARILY
12		REDUCED BY AN AMOUNT EQUAL TO THE PERCENTAGE OF CAPACITY
13		RETIRED?
14	A.	No. As capacity is retired at a multi-unit generating facility, the advantages of
15		economies of scale are decreased. For instance, when a generating facility has multiple
16		units, there are often shared assets such as fuel delivery and water treatment systems,
17		tools, buildings and infrastructure, and transformers. When a unit retires, the expenses
18		associated with those shared assets must now be distributed amongst fewer units.
19		Additionally, Mr. Norwood's capacity-based approach assumes that each unit
20		contributes equally to the overall plant-level O&M expense on a \$/MW basis. This
21		would only be true if all units exhibited identical operational and maintenance
22		characteristics (e.g., hours of operation, heat rate, equipment failures, etc.). Mr.
23		Norwood's capacity-based, plant-level method of calculating the impact of the retired

- units on Test Year expense is not based on a known and measurable change and overstates the costs attributable to the retired units.
- 3 Q. DOES MR. NORWOOD'S RECOMMENDED TEST YEAR ADJUSTMENT FOR
- 4 THE RETIRED UNITS RESULT IN A REASONABLE LEVEL OF ONGOING
- 5 EXPENSE?

12

- A. No, it does not. The Company's requested level of ongoing Generation O&M includes
 the removal of the retired units' Test Year expense (\$616,316) in its entirety. This
 reduction is a known and measurable adjustment, based on historic actual costs for
 these units. Further reducing Test Year expense by \$1,083,563, the difference between
 Mr. Norwood's total recommended plant-level reduction of \$1,699,879 and \$616,316
 is the equivalent of a making a Test Year adjustment nearly 3 times greater than the
- 13 Q. PLEASE SUMMARIZE YOUR RESPONSE TO MR. NORWOOD.

amount actually attributable to the retired units.

14 Α. Mr. Norwood's recommended adjustments to Test Year Generation O&M at Dolet 15 Hills and the five retired gas units are unreasonable and overstated. With respect to 16 Dolet Hills, it is not reasonable to eliminate O&M expense for a plant that will continue 17 to operate for almost a year after the effective date of rates in this case. Mr. Norwood's 18 proposed Test Year Generation O&M adjustment to account for the five retired gas 19 units incorporates the Company's adjustment without even discussing it in his 20 testimony, then includes further adjustments based on plant-level calculations that 21 grossly overstate the retired units' actual O&M expense incurred in the Test Year. The 22 Company's adjustment, which removes the actual amount of the retired units' Test 23 Year expense, accurately reflects the reduction that will result from those retirements.

IV.	MS. GLICK -	WELSH PLANT	RETROFIT	ANALYSIS

- 2 Q. ON PAGE 7, LINE 11, AND PAGE 40, LINE 15, THROUGH PAGE 41, LINE 21,
- 3 OF HER TESTIMONY, MS. GLICK FINDS THAT THE COMPANY HAS NOT
- 4 PERFORMED AN ANALYSIS SUPPORTING THE PRUDENCE OF
- 5 RETROFITTING THE WELSH PLANT UNITS TO OPERATE ON NATURAL
- 6 GAS. WHY HAS THIS ANALYSIS NOT BEEN PERFORMED?
- 7 A. Although the Company has made the decision to cease burning coal at the Welsh Plant
- 8 in 2028, it has not yet made a decision whether to convert Units 1 & 3 from coal to
- 9 natural gas-fired operations. As 2028 approaches, the Company will monitor various
- factors with the potential to change over time and influence the outcome of its decision.
- These factors include such things as federal and state requirements, natural gas prices,
- and energy market conditions. At a time when the Company has sufficient information
- to do so, analyses regarding the disposition of Welsh Units 1 & 3 post coal-burning
- operations will be performed.
- 15 Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?
- 16 A. Yes, it does.

SOUTHWESTERN ELECTRIC POWER COMPANY Retired Unit O&M Cost Removal For the Test Year Ended March 31, 2020

SOUTHWESTERN ELECTRIC POWER COMPANY'S RESPONSE TO EAST TEXAS ELECTRIC COOPERATIVE, INC. AND NORTHEAST TEXAS ELECTRIC COOPERATIVE, INC.'S FIRST REQUEST FOR INFORMATION

Question No. ETEC-NTEC 1-20:

Adjustment A-3.7 reduces O&M costs associated with retired units for Knox Lee, Lone Star, and Lieberman power plants. Please discuss the methodology and assumptions used to determine the reduction to O&M expense. In addition, please provide the O&M costs associated with the retired units during the test year ending March 31, 2020.

Response No. ETEC-NTEC 1-20:

The electronically filed workpaper for adjustment A-3.7 details the adjustment to remove test year Generation O&M associated with the retired units. See ETEC-NTEC 1-20 Attachment 1 for the retired unit test year O&M, by unit.
